## Summary

---

Experienced IT professional with over three years in full-stack web development, graphic design, and technical training. Skilled in both front-end and back-end development, I have completed more than 250 projects focused on solving real-life problems for clients, collaborating with local and international teams. With a strong foundation in Computer Science and hands-on expertise, I am dedicated to mentoring students and supporting their growth in the field of IT.

## Technical Skills

---

**Programming Languages:** HTML, CSS, JavaScript, Typescript, python, PHP

**Frameworks/Libraries:** Bootstrap, Tailwind CSS, Laravel, React, Node.js

**Databases:** MySQL, Oracle, SQLite, MongoDB

**Other Skills:** CCTV Installation Configuration and Maintenance, Graphic Design, UI/UX Design

## Education

---

Bachelor of : Computer Science in Information technology: 2024 - **Amoud University**

course of : Google IT Support: 2024 - **E-learning platform of Coursera**

course of : Google Project Management: 2023 - **E-learning platform of Coursera**

Course of : Dynamic User Interfaces (UI) 2020 - **E-learning platform of Coursera**

## Notable Projects

---

Throughout my career, I have built more than 250 projects, some of which I have completed for self-improvement and skill testing, while others involved collaboration with local and international teams. I am dedicated to serving my clients to the best of my ability, regardless of their location.

Among these projects are:

- **Amoud Foundation System:** I developed a specialized system tailored to the needs of Amoud Foundation, designed to support orphans by tracking their health, educational progress, and other essential aspects. I am grateful for the opportunity to collaborate with Eng. Abdulkarem Mahdi, an instructor at Amoud University, whose insights were invaluable to this project.
- **Power Gym Management System:** Created a comprehensive gym management system with two components: staffs and management. The system facilitates new member registration, enables membership upgrades, and includes alert systems for expiring memberships to ensure timely renewals. It also manages debts and discounts, allows data import from Excel or CSV formats, provides daily backups for data integrity, and generates detailed reports for business performance, making it an essential tool for gym operations.
- **Allnour Secondary School System:** Designed a comprehensive school management system featuring a multi-role structure, including a student portal, a parent interface, an administrator side, and a school president's interface, to streamline communication and enhance administrative efficiency.
- **Royal Dental System:** Designed a system for Royal Dental to manage patient appointments, records, billing, and inventory.
